

ZONE 1: ELECTRICAL SAFETY (The Fire Risk)

- ☐ RCD (Trip Switch) Test: Does the safety cut-off actually work when the "Test" button is pressed?
- ☐ Loose Neutral Check: Infrared scan of the fuse box (Hotspots = Fire risk).
- ☐ Exposed Wiring: Check behind the washing machine and under kitchen plinths.
- ☐ Earthing: Is the water heater (Boiler) legally earthed?

ZONE 2: MOISTURE & PLUMBING (The "Silent Killer")

- ☐ Pressure Drop Test: Close all taps. Watch the water meter for 5 minutes. Movement = Hidden Leak.
- ☐ Grout Integrity: Are shower tiles hollow? (Water behind the wall).
- ☐ Angle Valves: Are the isolation valves under the sinks rusted/seized? (If a pipe bursts, can you stop it?)
- ☐ Mold Mapping: Moisture meter check on "cold walls" (Thermal bridging).

ZONE 3: HVAC & CLIMATE (The Money Waster)

- ☐ A/C Delta-T: Measure air temp at intake vs. output. (Difference <10°C = Low Freon/Broken).
- ☐ Boiler Anode: Has the sacrificial anode been checked in the last 2 years? (Prevents tank corrosion).
- ☐ Radiator Sludge: Are the bottoms of radiators cold? (System blockage).

ZONE 4: STRUCTURAL & ENVELOPE

- ☐ Window Seals: Paper test on rubber gaskets. (Air leaks = High heating bills).
- ☐ Balcony Drainage: Pour water test. Does it pool or drain? (Waterproofing risk).
- ☐ Roller Shutters: Strap condition check (Frayed straps snap unexpectedly).

ZONE 5: SECURITY

- ☐ Lock Core: Is the cylinder flush with the door? (Protruding cylinder = Snapping risk).
- ☐ Safety Door Alignment: Does the bolt engage fully without lifting the handle?

78% of foreign investors in Athens buy resale apartments. Most have **hidden defects** painted over by sellers. This checklist isn't paranoia; it's **asset protection**.

I am Arnaud, your Technical Partner on the ground. **I don't just collect rent; I protect the concrete.** I apply French Technical Standards to the Greek Reality to ensure your investment performs.
